SUBJECT: Smith & Loveless Inc. Self-Certification: ARRA Act of 2009 – Buy American Provision

To Whom it May Concern:

As a wholly-owned United States owned company, Smith & Loveless is pleased to provide this letter of self-certification concerning the American Recovery & Reinvestment Act of 2009's "Buy American Provision" stated in Section 1605.

Founded in 1946 in Kansas City, Smith & Loveless Inc. produces 100 percent of its wastewater treatment and pumping systems at its U.S. facilities in Lenexa, Kansas (primary facility and company headquarters), Sunset Hills, Missouri, and Norwalk, California. Further, Smith & Loveless manufactures these products utilizing American-produced goods and raw materials. These include:

Steel: Smith & Loveless procures several thousand tons of steel a year for the manufacture of its complete line of wastewater treatment and pumping systems—all of which comes from U.S. steel mills.

Cast Iron: Smith & Loveless uses only foundries located in the United States for pouring its castings.

Motors: All Smith & Loveless Pumps utilize quality motors, which come from a network of suppliers all based in the United States.

Control Panels: All Smith & Loveless Control Panels are made in the United States at Smith & Loveless' main factory in Lenexa, Kan. or in the surrounding Kansas City metropolitan area.

Thank you for your review of the above information. Any questions may be submitted to Smith & Loveless via e-mail at answers@smithandloveless.com (please use subject of "ARRA Self-Certification") or by calling our system managers directly at 913-888-5201 (please indicate whether your project concerns a new installation or a retrofit/rehabilitation of an existing installation).

Best Regards,

Smith & Loveless Inc.
