

## PISTA® TURBO™ Grit Pump for Maximum Grit Pumping Efficiency

The **PISTA® TURBO™** Grit Pump's heavy-duty design provides maximum grit pumping efficiency for Smith & Loveless **PISTA®** Grit Chamber grit hoppers. Designed specially for pumping grit slurry, the **PISTA® TURBO™** Grit Pump comes equipped with a Ni-Hard volute and recessed impeller (located separately from the abrasive flow path) as well as the famous staples of S&L pump design: an oversized, stainless steel shaft and oversized bearings. This powerful combination yields reliable grit pumping and the velocity required for effective grit washing and dewatering devices, day-in and day-out for numerous years.

### Benefits

#### Flexible Application

**PISTA® TURBO™** Grit Pumps can be remote-mounted flooded suction or top-mounted vacuum-primed (with **Sonic Start®** prime sensing, photo at right). Top-mounted units eliminate expensive piping while lowering the head and horsepower requirements — and thereby lowering operational costs.

Top-Mounted Vacuum Prime Arrangement

PISTA® Grit Chamber with remote-mounted PISTA® TURBO™ Grit Pump

#### Ideal Upgrade for Airlifts

Older systems may employ airlifts, which are less efficient and require blowers to remove collected grit. The **PISTA® TURBO™** Grit Pump delivers more flow at a higher head, including at higher elevations.

#### How it Works

Lower chamber allows for economical intermittent pumping.

### PISTA® TURBO™ Grit Pump Data

Capacity:	Up to 500 GPM (31.5 lps)
Sizing:	4" and 6" (100 - 150 mm)
Type:	Remote-Mounted Flooded Suction or Top-Mounted Vacuum Prime
Materials:	Ni-Hard Impeller & Volute

## PISTA® TURBO™ Grit Pump 3-D Cutaway

Oversized thrust bearing  
(locked for no end play)

Oversized stainless steel  
shaft

Heat dissipating bronze  
mechanical shaft seal

Recessed Ni-Hard Impeller

Vertical construction of pump  
makes removal of motor and  
impeller easy
