H56A37B	4"	RH	RAPIDJACK® Check Valve
H56A37C	6"	LH	RAPIDJACK® Check Valve
H56A37D	6"	RH	RAPIDJACK® Check Valve

RAPIDJACK® BUYING OPTIONS

OPTION 1: PART

The **RAPIDJACK®** can be purchased as a stand-alone part that inserts into new piping layouts or can replace valves measuring 5" lay length for 4" piping or 5.5" lay length for 6" piping.

REQUIREMENT: MUST HAVE SPACE FOR A 5" LAY LENGTH FOR 4" PIPING OR 5.5" LAY LENGTH FOR 6" PIPING.

OPTION 2: PIPING SKID

Many Smith & Loveless® pump stations require a new piping skid to insert the **RAPIDJACK®** because the lay length of the **RAPIDJACK®** is larger than a standard wafer check valve.

Smith & Loveless® can review each pump station's piping layout and determine what piping modifications are required.
